# Who We Are

## Microsoft Advanced Specializations

### Modern Work

- ✓ Teamwork Deployment
- ✓ Meetings & Meeting Rooms for Microsoft Teams
- ✓ Calling for Teams
- ✓ Endpoint Management

### Security & Compliance

- ✓ Information Protection & Governance
- ✓ Threat Protection
- ✓ Identity & Access Management
- ✓ Cloud Security

### Azure Apps & Infrastructure

- ✓ Azure Virtual Desktop
- ✓ Azure VMware Solution
- ✓ Infra and Database Migration to Azure

Member of  
**Microsoft Intelligent  
Security Association**

Microsoft Verified  
Managed XDR Solution

- 
- 2022 Microsoft US Partner of the Year: Modern Endpoint Management
  - 2022 Microsoft US Partner of the Year: Meetings, Calling, & Devices for Microsoft Teams
  - 2020 Microsoft US Modern Workplace Partner of the Year: Teams Calling and Meetings
  - 2018 Microsoft US Modern Workplace Partner of the Year: Intelligent Communications
  - 2015 Microsoft Unified Communications Partner of the Year (including 2009, 2010)
  - 2015 Microsoft Global Communications Partner of the Year
  - 2010 Microsoft East Region Overall Partner of the Year: All Competencies
  - 2009 Microsoft Global Unified Communications Partner of the Year
  - 2008 Microsoft US Higher Education Partner of the Year

**Microsoft Partner of the Year**

# What We Do

## Microsoft 365

- Exchange Online
- OneDrive
- Microsoft Teams Phone, Meetings, Rooms
- Endpoint Management
- SharePoint
- Microsoft 365 Copilot

## Microsoft Azure

- Azure Migrations
- Entra ID
- Azure Storage
- Azure VMware Solution
- Nutanix Cloud Clusters on Azure

## Modern Datacenter Architecture

- Nutanix
- Cohesity
- Cisco
- VMware
- Pure Storage

## Security & Compliance

- Microsoft 365 Security
- Microsoft Intune
- Microsoft Purview
- Azure Security
- Arctic Wolf
- ThreatHunter MXDR

## Virtual Desktops

- Azure Virtual Desktop
- Citrix
- Horizon

## Data, AI, Apps & Automation

- Azure
- Azure Open AI
- **Agents**
- Microsoft Power Platform
- Microsoft Fabric

## Business Transformation Services

- Organizational Change Management
- Strategic Advisory Services
- Cloud Service Provider
- Licensing Optimization

## Cloud Data Protection

- Rubrik
- Cohesity

## Disaster Recovery

- Azure Site Recovery
- Nutanix
- Zerto

## Networking

- Cisco
- Meraki

**Managed Services to  
Support All Solutions**

# The Problems We Are Solving

---

Agents are the latest buzz in the AI world and without understanding their place in the AI ecosystem, you will miss out on effective and relatively low-cost AI benefits.

“ *There’s no question that agentic AI is a major and significant trend in 2025 and beyond.* ”  
— Gartner, via Forbes

# Outcomes From This Session

---

**Agents, agents, agents!** It's time to unravel what an agent is, how they work and how to best integrate them into your workforce and ways of working.

Agents do not have to be difficult to implement, nor do they have to be cost-prohibitive. Let's explore **how to create pragmatic agents** that can quickly improve and scale your existing workforce's abilities.

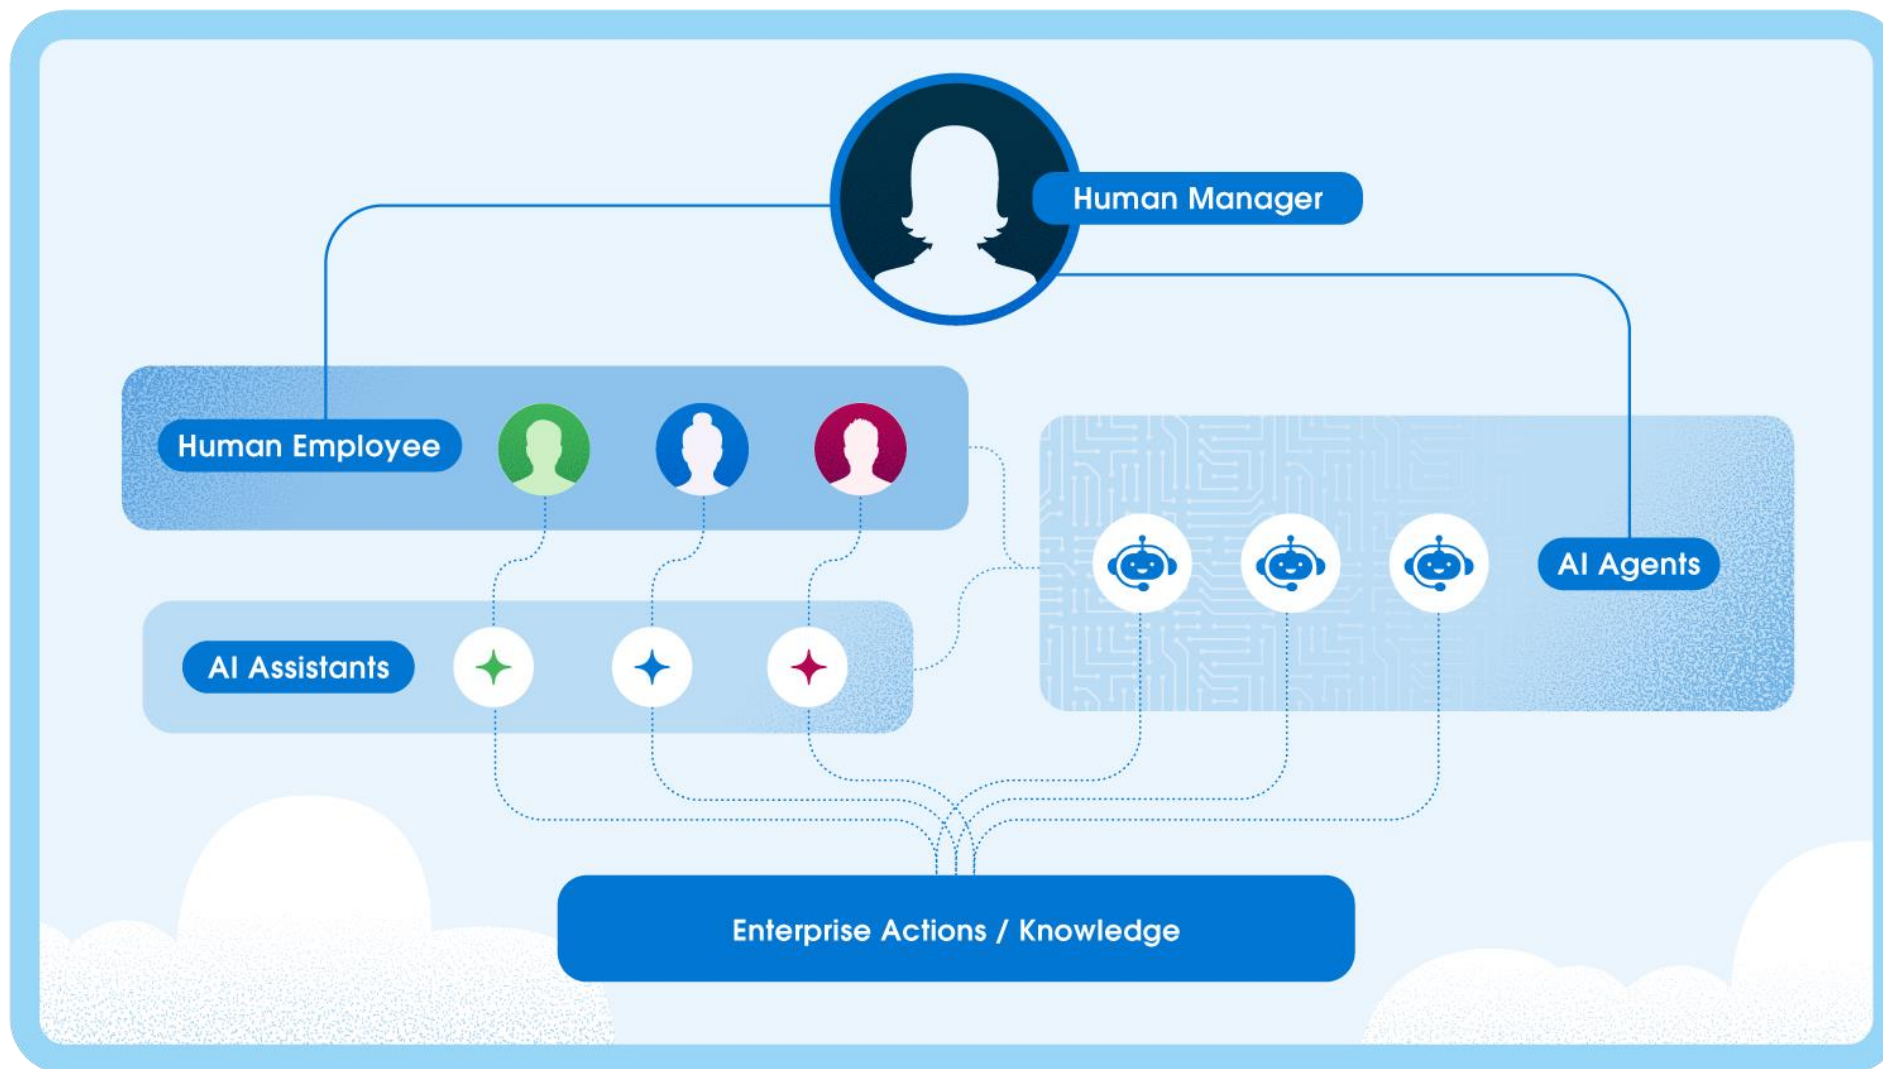

Seeing is believing so we will shift into demo mode so that you can **see how agents are built, how they function** and get you thinking of agents for your organization.

# Intro To Agents

Quick introduction to and overview of Agentic AI.

# Agents in the Workforce

# Introducing Agents

Copilot

Human augmentation

Private, Personal Assistant

Every employee will have a Copilot

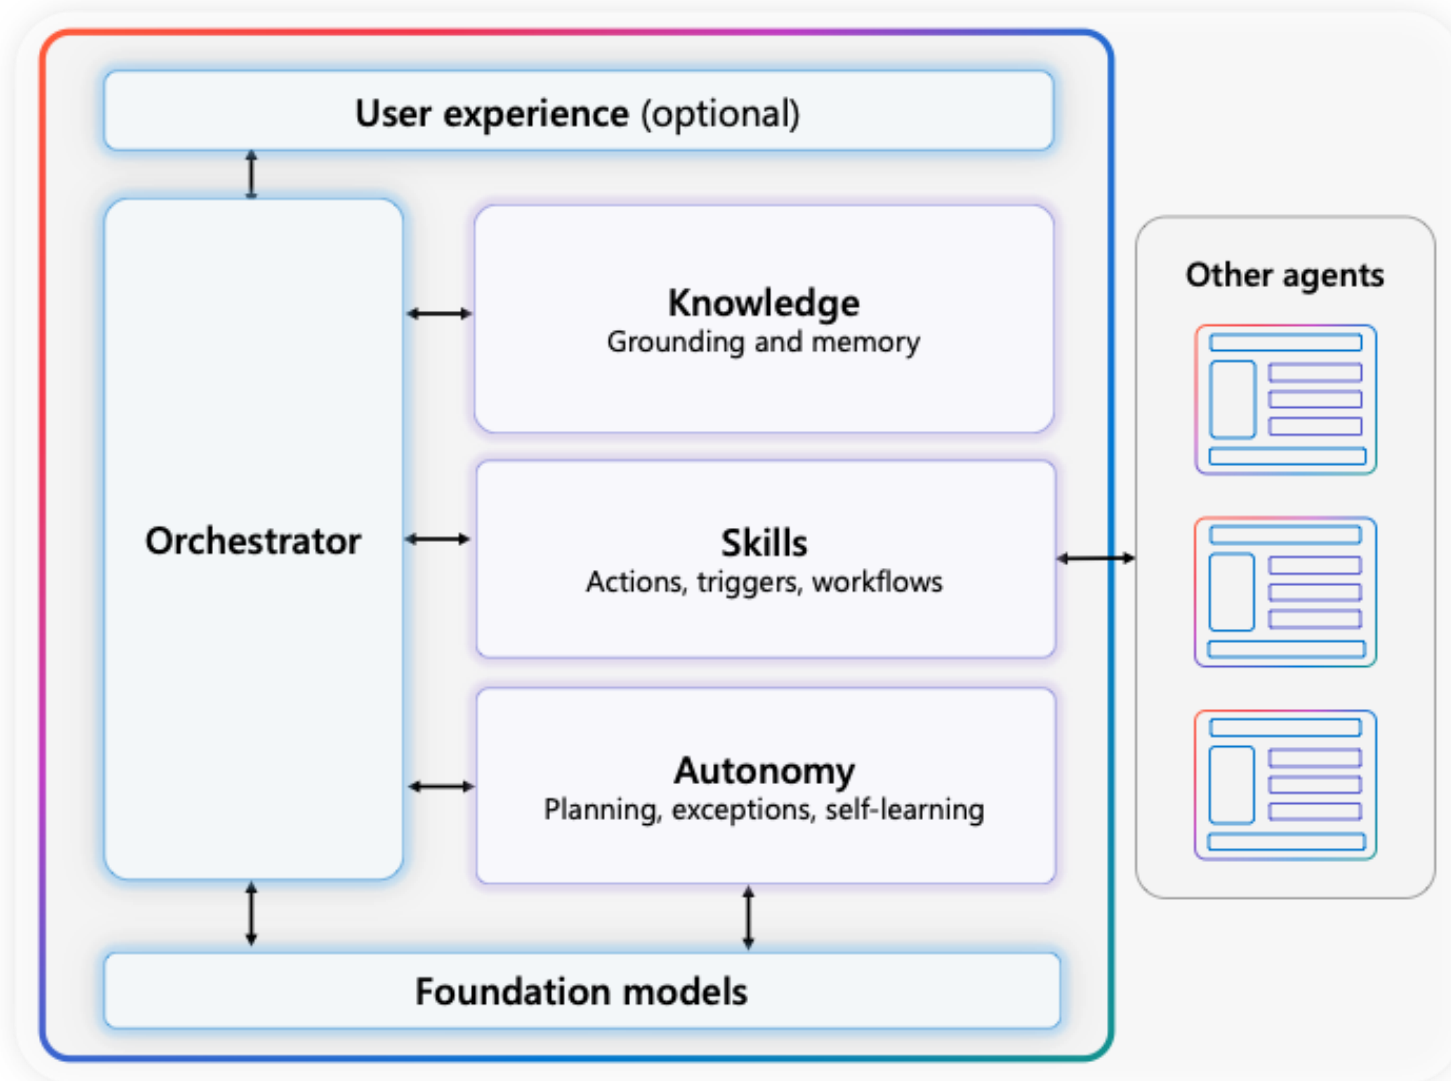

Agents

Connected to Copilot or autonomous

Automates tasks and processes

Every business process will have an agent

# What is Inside of an Agent?

# Agents Run on a Secure & Trusted Platform

## Data Security

Leverage label inheritance and data loss prevention policies

Intelligent grounding respects your permissions and security controls

Comprehensive visibility into user, data, and agent risks

## Access & Cost Controls

Control agent availability and access

Control who can create and sharing of agents

Track and manage agent costs and operational insights

## Measurement & Reporting

View core usage telemetry and track license utilization

Track improvements in user productivity and compare impact across groups

Analyze Copilot & agents' impact to business outcomes

Agent interactions stay in the Microsoft 365 and Azure Service Boundary and your Microsoft 365 security, governance, compliance, and privacy policies apply

# Spectrum of Agent Types

Copilot agents are AI assistants that can help optimize business processes and enhance productivity

Copilot agents vary in level of complexity and capabilities depending on your need

*Simple*

## Retrieval

Retrieve information from grounding data, reason, summarize, and answer user questions

Copilot Chat agents with Agent Builder or  
Custom agents with Copilot Studio

## Task

Take actions when asked, automate workflows, and replace repetitive tasks for users

Custom agents with Copilot Studio

## Autonomous

Operate independently, dynamically plan, orchestrate other agents, learn and escalate

Custom agents with Copilot Studio

*Advanced*

# Continuum of Solutions

## IT Helpdesk agent

How do I connect to the corporate network?

## Device Refresh agent

Request a new laptop and send approvals via IT Service tool.

## Lead Gen agent

The agent has identified and researched 15 new leads for you to review.

Simple

Advanced

## Project Tracker agent

What is the status of phase 2 for project X and the remaining budget?

## Budget Management agent

Review outstanding open PO's and begin financial planning.

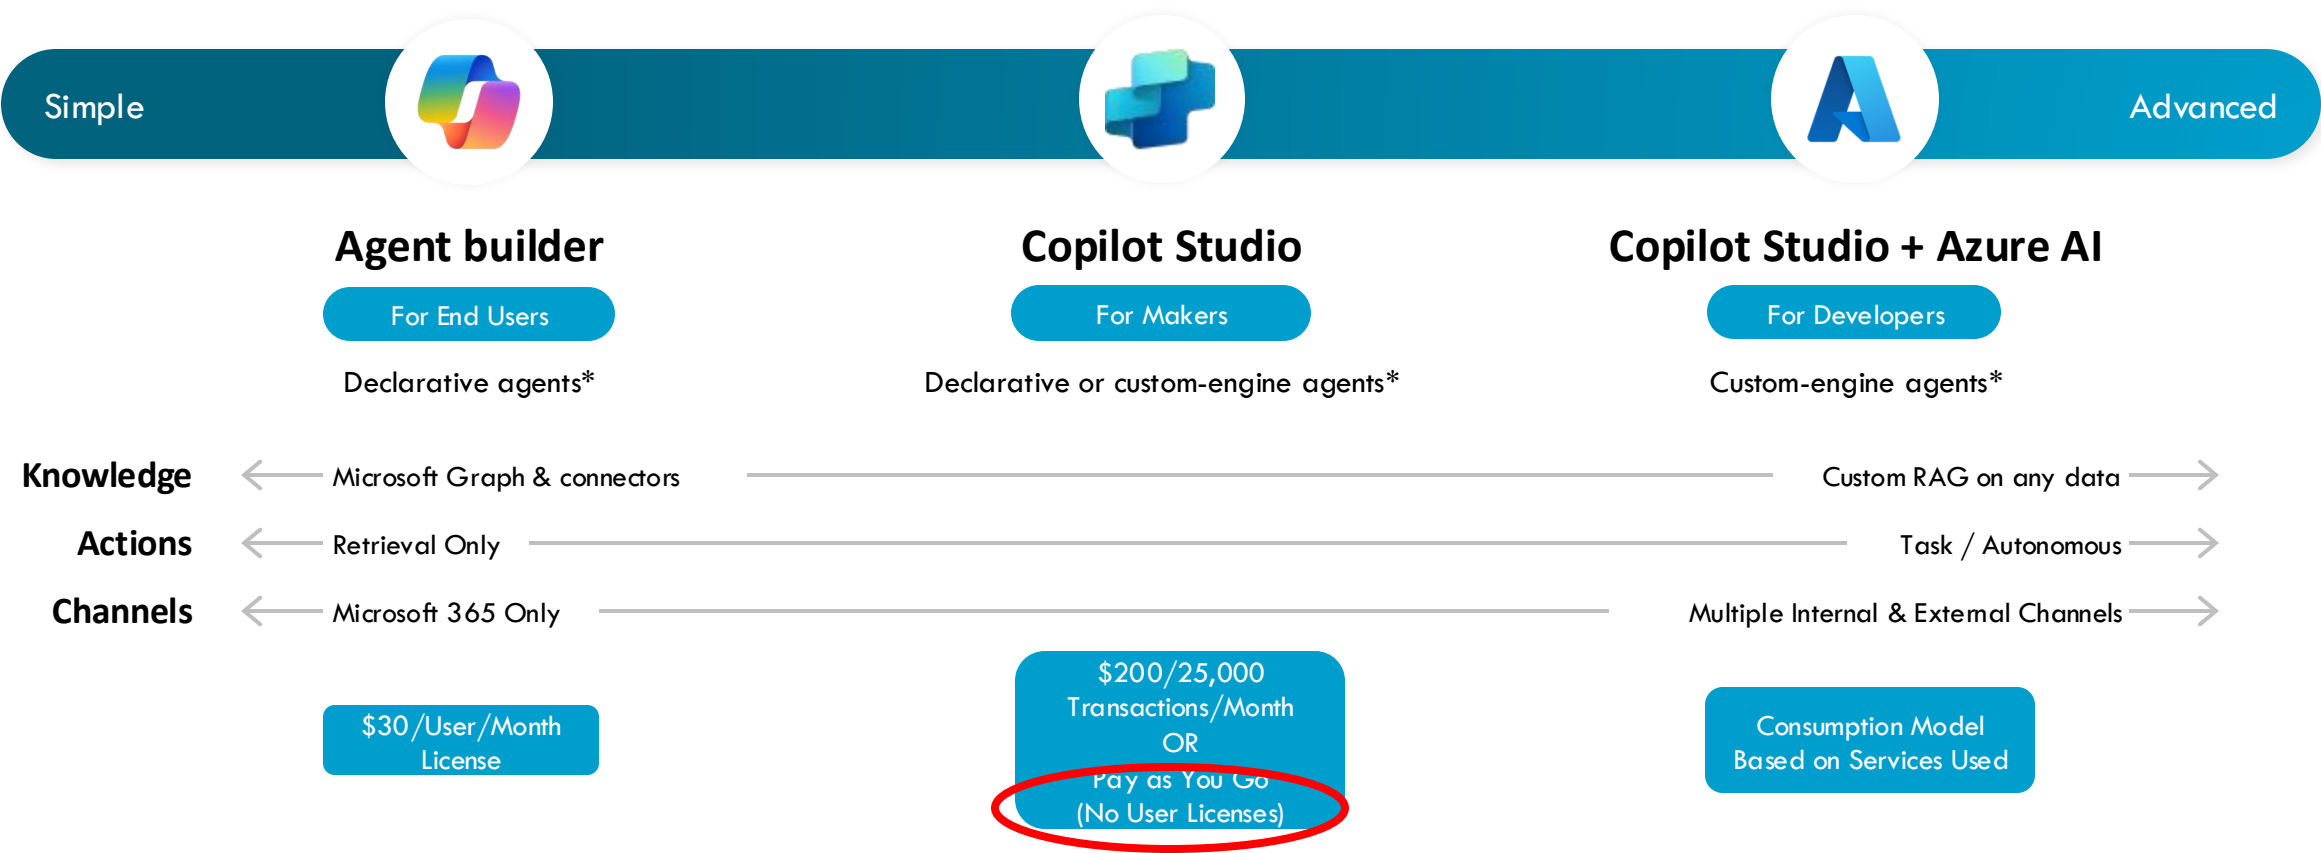

## Customer Support agent

The agent has identified new support issues and triaged to other agents.

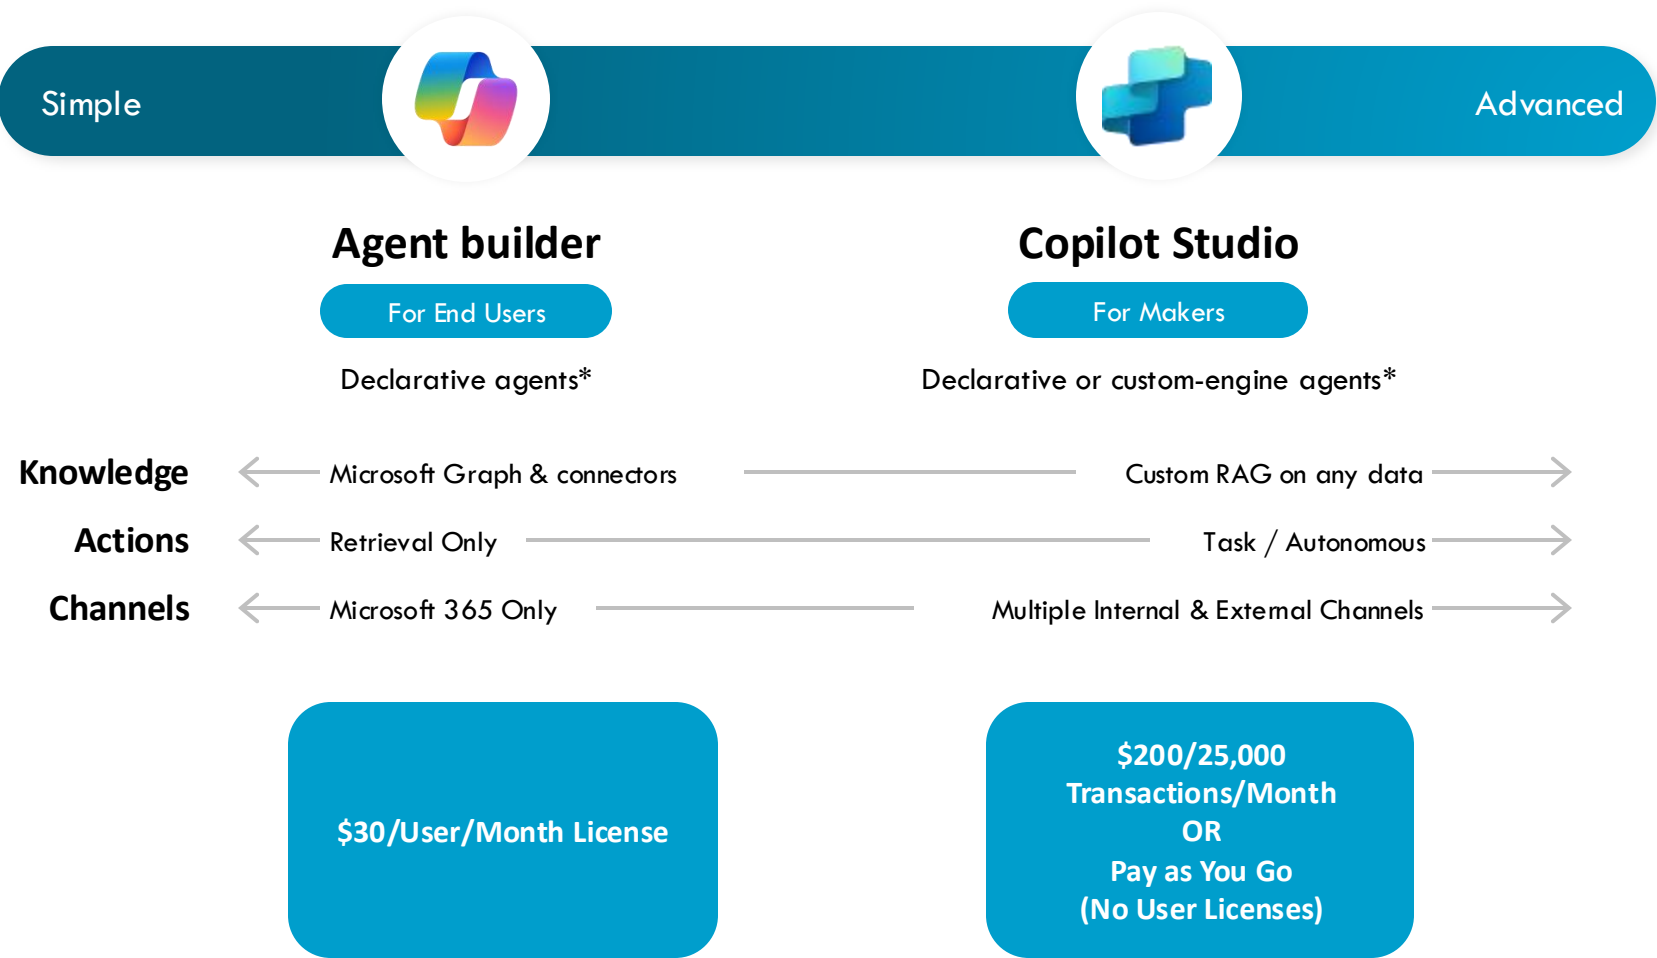

# Agent Creation Tools

\* Declarative = prompts handled by Microsoft 365 Copilot; Custom-engine = prompts handled by custom AI engine (i.e., orchestrator and foundation models)

# Agents Manage Initial Costs

### Sample Cost Scenario

1,000-person organization  
(20 office workers + 980 frontline workers)

Option 1

- License all for M365 Copilot

\$360,000/year

Option 2

- License 20 for Copilot
- License 980 for an HR Policy Agent

\$9,600\*/year

\*Assumes 25,000 agent interactions/month.

# Agents Help Secure Your Content

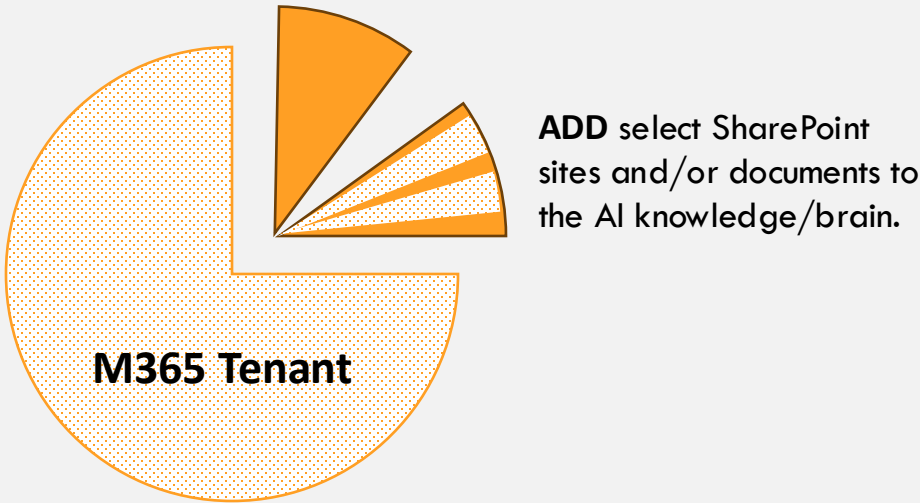

## Security Through *EXCLUSION* (Microsoft 365 Copilot)

PROS	CONS
Quickly remove areas of concern from discovery.	Removes entire SharePoint sites/no fine tuning.
Deploy M365 Copilot while cleaning up content access.	Disables SharePoint search on excluded sites.
	Might still miss content in other sites.

**VS**

## Security Through *INCLUSION* (Agents)

PROS	CONS
Takes a surgical approach to including content.	Requires development of a custom agent.
Focus the AI on the content that is relevant to its function and audience.	
Improved accuracy.	

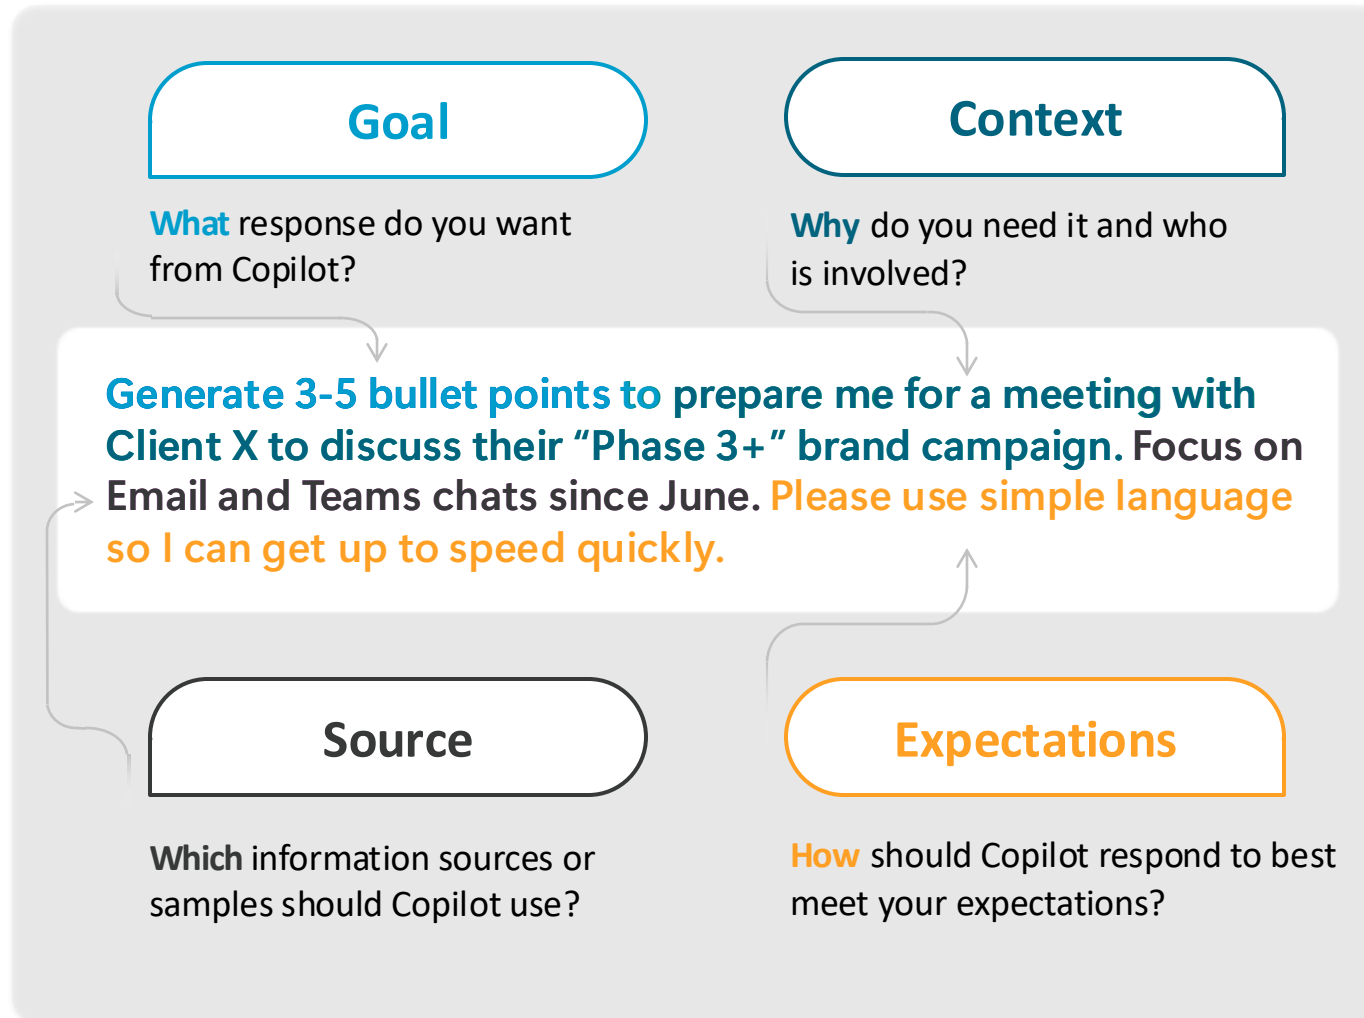

# Prompting

Introducing the importance of prompting.

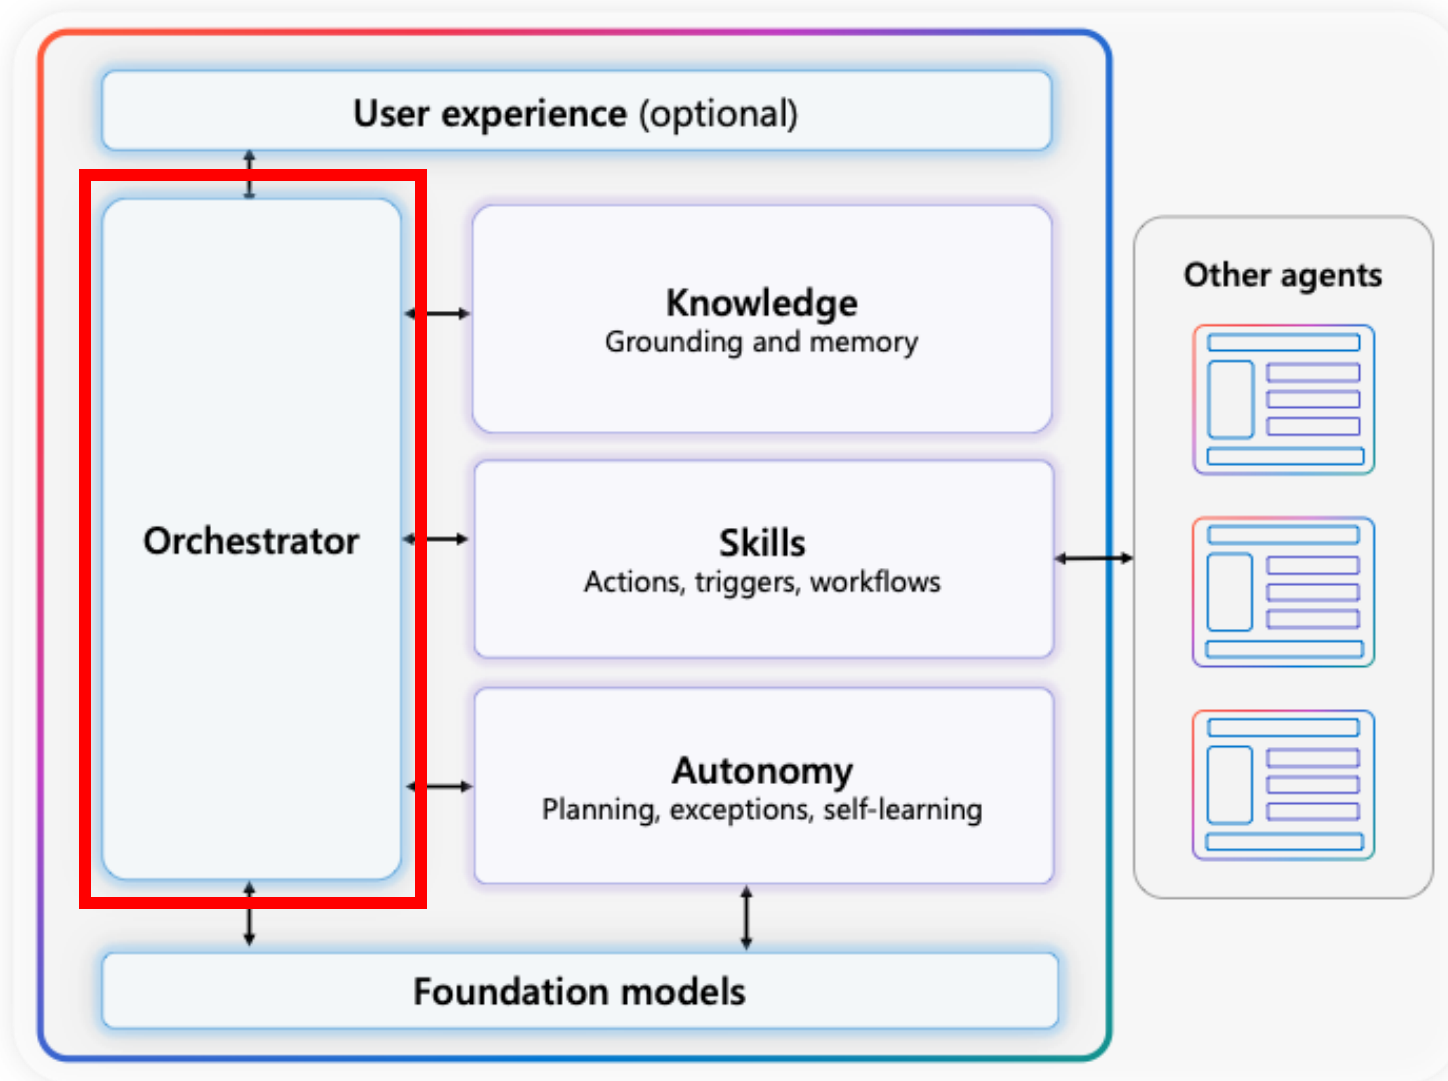

# A Different Type of Prompt

Microsoft 365 Copilot prompts are focused on executing specific, **point-in-time** tasks.

Agent prompts are intended to provide a detailed set of instructions that are **repeated** over time.

# What Roles do the Agent Prompt Play?

- Prompts are the instruction set that explain to an agent what its purpose is and what it is supposed to do.
- Prompts give an agent its personality.
- Prompts provide guardrails for an agent.
- Prompts structure the output of an agent.
- Prompts prevent hallucinations or unintended outcomes.

# Prompt Framework

## # INSTRUCTIONS

1. Clearly define the task or question you want the model to address.
2. Provide any necessary context or background information.
3. Specify any constraints or requirements for the response.
4. Optionally, include examples of desired output.

### # TASK

<task>

</task>

### # CONSTRAINTS

<constraints>

</constraints>

### # OUTPUT

<output>

</output>

### # CONTEXT

<context>

</context>

### # EXAMPLES

<examples>

</examples>

### # SOURCES

<sources>

</sources>

### # TEMPLATE

<template>

</template>

### # GUIDELINES

<guidelines>

</guidelines>

# Best Practices

---

1. Write as if you are explaining the job to a new employee - be specific and detailed...and no acronyms!
2. Don't skip on the basics.
3. Outline what you want the agent **NOT** to do.
4. Write, test, and troubleshoot your prompt one piece at a time...just like coding!
5. Use the AI to help you troubleshoot your prompt and recommend improvements.
6. Revisit your prompt over time to retest and refine, especially if your content has evolved.
7. Avoid unnecessary punctuation and formatting in your prompts.

# Copilot Studio - The Next Level

Use Copilot Studio “Settings” to influence your prompt’s behavior:

- Set the orchestration to “Classic” or “Generative”, the latter giving your agent more “freedom” to interact with users.
- Set moderation to control agent creativity.
- Use deep reasoning models to enhance an agent’s thought process.

# Prompt Demo

---

Let's build an agent...

# Agent In A Box

Build A Custom AI Agent Tailored To Your Business Needs

While out-of-the-box copilots like Microsoft 365 Copilot offer robust functionality, many business challenges require a custom AI agent designed specifically for your workflows. With **Agent in a Box**, you can experience the impact of a tailored AI agent through a rapid, hands-on proof-of-concept engagement.

## Custom AI Design

Tailored agent capabilities aligned with your unique business workflows and tasks.

## Rapid Proof of Concept

Build and deploy a functional AI agent in just one week, enabling quick evaluation and feedback.

## Measurable Impact

Validate the agent's effectiveness through real-world testing and ROI insights.

## Day 1: Kickoff & Discovery

- Align on objectives, finalize topics, and initiate design.

## Day 2: Design & Build

- Begin building the AI agent based on agreed scope.

## Day 3: Build Completion

- Finalize the initial build and review progress.

## Day 4: Feedback & Adjustment

- Refine the agent based on feedback.

## Day 5: Closeout & Handover

- Deliver the agent, schedule follow-up, and provide access.

# THANK YOU
