CHALLENGE	SOLUTION			OUTCOMES			TEAM	
Following a thorough Planning and Design engagement, Brooks Rehabilitation engaged eGroup Enabling Technologies to assist with a comprehensive migration to Exchange Online, OneDrive for Business, & a hybrid identity model for the 4,000+ end-users in the environment.	The engagement aimed to achieve several key objectives. First, it involved migrating email services to Exchange Online, which enhanced accessibility & collaboration. Second, it transitioned file storage & management to OneDrive, which provided a scalable & secure solution for data storage. Lastly, the engagement adopted a hybrid identity model that integrated on-premises & cloud-based authentication systems to streamline user access & management.			A seamless migration to Exchange Online and hybrid identity model, combining seasoned experts from the eGroup Enabling Technologies Engineering and Organizational Change Management Teams, followed by the completion of the OneDrive migration.
