February 2023	SMC	Manufacturing	2,000 employees	Migration of Encrypted Drive to SPOL	SharePoint Online	eGroup   Enabling Technologies	Ring Container Technologies	(2) Partners
CHALLENGE	SOLUTION	OUTCOMES	TEAM					
<p>Ring Container Technologies (RCT) was faced with modernizing its shared file system from On-Prem SharePoint 2013 and was ready to migrate this service to the cloud with SharePoint Online. The client had never gone through this type of migration before and sought outside assistance.</p>	<p>Ring Container Technologies engaged eGroup   Enabling Technologies to deliver planning, design, and guidance up-front on how to migrate with a successful outcome. Given eGroup   Enabling Technologies flexibility to “meet the customer where they are”, RCT chose to have eGroup   Enabling Technologies help pilot the migration to SharePoint Online and then allow their team to take to the finish line.</p>	<p>Ring Container Technologies was able to complete their migration to SharePoint Online in the timeframe they committed to in 1H of 2023. Their end-users had a much better experience being able to work off of their shared files from anywhere with a secure internet connection.</p> <p><i>There were two other competing partners and RCT chose eGroup   Enabling Technologies as we were flexible in being able to provide them either a turn-key solution or provide them the guidance to perform the migration themselves.</i></p>	<p><b>Account Executive</b> Jonathan Black</p> <p><b>Modern Work Specialist</b> Timothy Hillery</p> <p><b>Partner</b> Clint Boyleston, Account Executive</p> <p><b>Contractual Value</b> <b>2,000 users from O365 E3 to M365 E3</b></p>
