| <p>Texas Tech Health Sciences Center (TTUHSC) embarked on a strategic journey aimed at tenant divestiture, managing two tenants—TTUHSC0 and TTUHSC1. They aimed to leverage existing domain and tenant setup, with the goal to use Entra ID (f.kz Azure AD) for authentication, along with the desire for a plan to utilize M365 workloads, with Exchange Online being the top priority. Facing a ten-year-long process, the institution was eager to progress and enlisted the expertise of the FastTrack team at eGroup Enabling Technologies.</p> |         | <p>eGroup Enabling Technologies orchestrated a Planning Design Session to delve into TTUHSC's environment. Building upon architectural designs developed during proposal creation, the team crafted plans for each component and activity of the project, including configuration designs, implementation, and testing plans. By collaborating with stakeholders and understanding their specific needs, eGroup Enabling Technologies delivered a plan for the deployment of Microsoft 365 Tenant and Exchange Online. The tailored approach ensured that TTUHSC's unique environment was taken into account at every stage of the process, paving the way for a smooth and successful deployment.</p> |                 | <p>Through collaborative efforts with eGroup Enabling Technologies, TTUHSC underwent a comprehensive transformation resulting in optimized Entra ID structures and a strategic roadmap for migrating to Exchange Online. Planning Sessions offered invaluable insights into migration options, addressing key considerations such as mail routing, migration methods, compliance, and retention requirements. As a result, TTUHSC received a secure Entra ID framework and seamless migration to Exchange Online, empowering their workflow with enhanced efficiency and collaboration capabilities.</p> |                           | <p><b>Sr. Account Executive</b><br/>Samantha Borella</p> <p><b>ATS</b><br/>Humza Yasim</p> <p><b>Sr. Security Specialist</b><br/>Kyle Kim Costa</p> <p><b>CSAM</b><br/>Rita Christie</p> <p><b>FastTrack Architect</b><br/>T.H.
