<p>Michigan Senate wished to help their employees become more efficient with AI solutions such as Microsoft 365 Copilot. The employees deal with a lot of sensitive data and required a way to ensure the data remains classified and secure.</p>	<p>Michigan Senate and eGroup Enabling Technologies met and discussed potential solutions to meet their specific requirements.</p> <p>Microsoft Purview was identified during the discussion as a viable solution. Michigan Senate noted they lacked familiarity with the tool & looked to eGroup Enabling Technologies experts to assist.</p> <p>The experts then regrouped to focus first on educating Michigan Senate on Microsoft Purview before moving forward with their AI action plan.</p>	<p>The eGroup team implemented a Data Security Workshop so Michigan Senate could learn more regarding the capabilities of Purview and determine the best way to secure data ahead of their other AI initiatives.</p> <p>Once complete, Michigan Senate will continue their implementation process of introducing AI solutions to the extended team.</p>	<p>Account Executive Jason Jackson</p> <p>MW Specialist Megan Bradford</p> <p>Partner Kevin Radigan, Account Executive</p> <p>Contractual Value <i>-Currently leveraging technology already included in their Microsoft 365 investment</i></p>
