CHALLENGE	SOLUTION	OUTCOMES	TEAM
<p>EmergeOrtho currently manages seven distinct domains. The company is looking to streamline and simplify their domain operations by consolidating all seven into a singular one.</p>	<p>The solution for EmergeOrtho’s challenge was a Planning and Design engagement. This engagement involved a test group of 130 users who spread out over all seven domains. This test user group will be migrated into the singular EmergeOrtho domain.</p>	<p>Currently, EmergeOrtho is going through the Planning and Design phase of the project. The findings from this phase will be the foundation for the project across all seven domain migrations.</p> <p>This foundation will properly set up EmergeOrtho to use additional security tools and Microsoft 365 Copilot within their existing licensing across the organization.</p>	<p>Account Executive Braxton Sheport</p> <p>Security Specialist Ken Payne</p> <p>Partner Seth Green, Account Executive</p> <p>Contractual Value <i>-No additional ACR, however, sets customer up for growth & adoption of additional tools within Microsoft stack.</i></p>
